

For smooth integration of your business applications to SWIFT

Alliance Integrator is a middleware application designed and supported by SWIFT.

In combination with our expertise it can bring solution to all kinds of integration problems between your business applications and SWIFT.

We can integrate your business applications with SWIFT through Alliance Integrator and Alliance Access without you having to adapt your applications. This will result in reduced time, cost and risks while implementing and maintaining solutions.

Our integration services include the automation and monitoring of message flows, the support and conversion of different formats, the validation of your syntax and context and the recovery of databases.

Features

- Automation and monitoring of message flows;
- Support and conversion of formats;
- Validation of syntax and context;
- Recovery of database.

Benefits

- ✓ No changes in your back-office system;
- ✓ Support of any type of standards;
- ✓ Less cost, time and risks to implement and maintain solutions;
- ✓ Less system problems.

Our experience

Through our expertise, we have made different Intellect solutions suited to the needs of the client based on Alliance Integrator.

- SWIFT operates with specific standards. Does your back-office system include data sources incompatible with these standards? No problem! We have already transformed Oracle databases, FTP, Web GUI,...
- SWIFT operates on specific formats. Does your back-office system operate on formats incompatible with SWIFT ones? No problem! We have already transformed file types like FIN, XML,...
- SWIFT uses standard Latin alphabet. Does your back-office system operate on another alphabet? No problem! We have already enabled clients to use alphabets like Cyrillic, Arabic,...

Do you feel having even the slightest integration problem with SWIFT? Please contact us. We have the in-house experience to offer you a tailor-made solution.
